【Anti-Scalding Double-walled Design】 : Even if the kettle boils water, it just gets warm, not really hot! The outside is covered with a high-temperature resistant PP material, so it can effectively reduce heat transfer and prevent burns.

【Fast Boiling Electric Kettle】 : 2200W heating element for rapid boiling, our electric kettle is able to boil 1.7L water in 4-5min. Large capacity can make 7 cups, which is enough to meet the daily water needs of you and your family. And with LED indicator, you can know the status of the kettle.

【Safer Cordless Water Kettle】 : Electric kettle with boil-dry protection can protect the kettle if the water level is too low or there is no water in it to eliminate safety risks in the event of overheating. The bulge inside the lid can accelerate the cooling and condensation of water and reduce the water vapor at the moment of opening the lid. Don't let the steam of boiling water burn your hands.

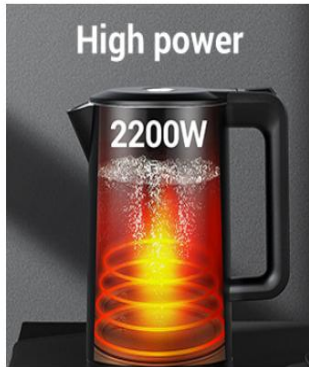

【Easy to Clean with Wide Opening】 : Designed with a wide mouth, This quick boil kettle is easy cleaning and filling. You can easily put your hand into the kettle to clean. Due to the hardness of the water, scale will form on the bottom of the kettle. Boil water and vinegar at a ratio of 1:2, and then leave for several hours, will remove scale effectively.

Cool Touch Double Wall Kettle

Exterior: Heat-Resistant PP

Internal: Food grade 304 stainless steel
Double Wall can effectively reduce heat transfer and prevent burns

2200W Fast Heating Element

The water kettle can quickly boil a pot of water in 4-5 minutes

Note: The specific boiling time depends on your water temperature

Precise Temperature Control

The electric kettle can automatically shut off about 5 seconds after the water boils. Provide you with a safer, more durable and more accurate experience
